

Ecowater eVOLUTION Water Softener Boost 300

- * Convenient - automatic salt level detection, salt tank light and large salt storage for less refills.
- * Built in Wi-Fi - enhanced Wi-Fi technology to monitor and send information via mobile devices or PC from virtually anywhere.**

eVOLUTION the Next Generation of Water Softeners by Ecowater

Ecowater is one of the worlds leading domestic water softener manufacturers. Ecowater's advanced water softening technology and unique smart software provides the ultimate in reliability efficiency and convenience.

Smart Design and Technology

The eVOLUTION range of water softeners offer a tailored solution to suit any size home. Our smart technology continually adapts to your home and lifestyle based on patterns of water usage.

Automatic salt level infrared detection and salt compartment light

The water softener uses a real time sensor and will automatically indicate when it needs more salt. A light will illuminate the salt compartment when opening the lid.

Efficient

eVOLUTION water softeners run optimal efficiency in terms of both salt and regeneration water use - up to 50% less running costs per year compared to a basic block salt softener system!

Reliable

Minimum moving parts.
Patented valve with teflon coated disc.
Multi-wrap fibreglass reinforced resin tank with 10 year warranty.

Size (W x D x H) 355 x 510 x 880

Soft Water Output
At 300 ppm 3200 Litres

Water use per regeneration at max capacity Only 2.15 %

Maximum flow (peak) 58 Litres/min

(**) Connectivity depending on compatibility of your private Wi-Fi network. No connection possible through public Wi-Fi networks. eVOLUTION softeners also work perfectly well without a Wi-Fi connection without any loss of performance.
